Rough summary of tasks:

Task #1

Overlay Fokus (in color #eeeeee)

Just for Example:
If Clicking on "**Marketing** ", " **Vertrieb** ", " **Recruiting** " , Javascript automatically scrolls down (already existing) and centers the next fields
" **Sichtbarkeit erhöhen** ", " **Aufwand reduzieren** ", " **Werbekosten senken** ", " **Weiß nicht genau** ", the whole container area in full size must now be focused, which means both areas, above and below the container, have to be overlay in color #eeeeee (gray).
In the further process I have drawn and described you exactly.

PS: This Task is very Important

In general, the subboxes become overlayd.

Task #2

Whole multistepform should get:
- a better and cleaner look conversion optimized.
- also the "**Contact Success Page**" (https://www.feeli.de/contact-success/), must be responsiv perfectly displayed on all devices, browsers and operating systems after sending form.
- Do not allow to accessed the "**Contact Success Page**" directly via this Link https://www.feeli.de/contact-success/). Should only be displayed when the form is completed and sent.

PS: This Task is very Important
